

Next meeting 27th Of October 12pm

Present: Frederick Harrington, Alex Austin, Mo Waqas, James Grant.

Aims:

1. Arrange a meeting with Fred
2. Start using Code and Repository quality assurance.
3. Deliverables
4. SQL database
5. Documentation Overview

Harry

- Add James, Mo and Alex to go daddy
- Alex and Harry need talk about templates
 - lists and descriptions for those.
- Keep working html, css front end.

Fred

- Documentation Overview for the first three sections.
- Organise the meeting with Fred.

James

- Will use Step by Step Platform Guide written in week 1 and SQL Tables to plan server side connections.
- Map all connections from database to server.
- James to research if the games should be stored on a database and run directly from them.
- Technical Description for the methods they have picked.

Mo

- Map Controller to View connections.
- Write possible function descriptions.

Alex

- UI dev environment up and running.
- Hopefully have a few template. Flat page, nothing will work.
- Technical Description for the methods they have picked.

Ending Notes

Aim for next week is to brainstorm each allocated sections,
Why are you using that technology?
What is required?
What functions/actions will be required?

Meeting doc posted as Evernote on Git and in PDF on chat.
