## HTML QA Checklist

### HTML

- Appropriate choice of tags for content, considering semantics where possible
  - E.g. 'nav' for navigation, 'i' for icons, 'span' for inline text
- Perfect indentation (tab spacing, 4 wide) on all child elements
  - Exceptions include cases of improved readability
- Tag split on elements with properties totaling over 100 columns
  - Achieved by placing each property on a new line
- Clean build from HTMLHint (<http://htmlhint.com/>) with no warnings
  - Excluding the following standards for Angular compatibility:
    - Title-require
    - Tag-self-close
    - Doctype-first
    - Attr-not-empty
