

Frederick Harrington
Fred Barnes
CO600: Project Meeting

Meeting 9th March 2016

Present: Alex, Harry, Fred, Mo, James

Aims:

- Set work for the next few days
- Get a few people back on track

Harry:

- Quiz completed
- Factories to limit the amount they have change
- Web socket implementation to get around project blocking
- Quiz submission abilities
- Set ready working well on the web sockets

Fred:

- Corpus Index
- Reformatting docs
- Will drop all coding to work on documentation

James:

- Abstract for poster fair
- API on open shift
- Needs to write TCP connections to lobby, JSON decoded and encode into bit streams.
- After this the backend will be complete.
- Documentation after poster fair
- Will try to comment out broken code to enable front-end to start work.

Mo:

- Video App (like Soundcloud).
- Allows multi users to add comments to parts of the video.
- Video uses youtube.
- By the end of the weekend he will have made major movement on his application

Alex:

- Working on the tanks game
- Working with James to get the API on open shift

Ending Notes:

Major Crunch Mode

Lots of War rooming required.
