Code Standards

Coding Convention:	HTML QA Checklist
Conformity to Standard:	Indentation and naming are correct. Not all tags are split when they are over 100 columns. Many are but I found a few that were not. Code receives clean building from htmlhint.com precedes two warnings. Firstly the doctype was not declared at the top. The second is that the value of an attribute on line 47 should use square brackets.
Read-Me File:	N/A
Commenting:	Use of commenting is correct.

Changes Made/ToDo:	Split a few tabs over 100 columns, add the doctype to the top of the document and use square brackets on line 47.
