Image Annotate Read-me

Overview

This application was completely created by Harry Jones HJ80, this document was created by Frederick Harrington.

Image annotate allows the desktop user or host to load a image to which the mobile users can annotate upon. The mobile user is given a large selection of colours to annotate with. Furthermore the user is given the ability to undo the annotations they have made. Each mobile user is separated on the canvas therefore no one mobile user can remove the annotation of another mobile user.
