

Create Your Own Quiz Readme

Overview

In this application, users are able to create their own quizzes and upload them to a database for playing on ANXED.

Quizzes require a title, description, and at least one question. Optionally, users may upload an image to use as the tile for their quiz on the website.

A question may have between 2 and 4 possible answers, with one of them being correct.

The screenshot shows the 'Create your own quiz' interface within the ANEXD application. The interface is displayed as a modal window with a close button (X) in the top left corner. The background of the application shows the ANEXD logo and the user's email address (hj80@kent.ac.uk) and profile icon in the top right corner.

The 'Create your own quiz' form includes the following fields and controls:

- Quiz Title:** A text input field labeled 'Title'.
- Description:** A text input field labeled 'Description'.
- Image:** A section with a 'Select' button and a note 'Suggested size: 650px x 480px'.
- Question 1:** A text input field labeled 'Question'.
- Number of options:** A dropdown menu currently set to '2'.
- Options:** A list of two options, 'A. Answer 1' and 'B. Answer 2', each with a checkbox. Option A is selected.
- Buttons:** Two green buttons at the bottom: 'Add another question' and 'Submit'.
