

ANEXD Front-end

On completion of the project's front-end, we will have a number of screens that visualize the application flow.

The work required for the front-end will provide us with a desktop-suitable website for the creation and management of lobbies and applications, as well as a responsive mobile site for engaging with ANEXD applications.

Home

This is the initial landing page for desktop browsers. It outlines the capabilities of the project and provides routes for account management/login, available application browsing, and instant lobby launching.

ANEXD

The screenshot shows the ANEXD home page. At the top left is the ANEXD logo. On the right are three icons: a user profile, a gear, and a right-pointing arrow. Below these are three main buttons: 'Login' (with a user icon), 'Create' (with a gear icon), and 'Play' (with a play triangle icon). Each button has a subtitle: 'Sign up to access ANEXD' for Login, 'Choose a quiz or create your own' for Create, and 'Get a unique code to share with your players' for Play. A large banner at the bottom features three quiz cards for 'THE SATAN TEST', 'THE SATAN TEST 2', and 'THE SATAN TEST 3'. Each card has a title, a short description, and a right-pointing arrow. Below the banner are three category buttons: 'ALL', 'SATAN' (which is highlighted in blue), and 'COMPUTING'.

Login

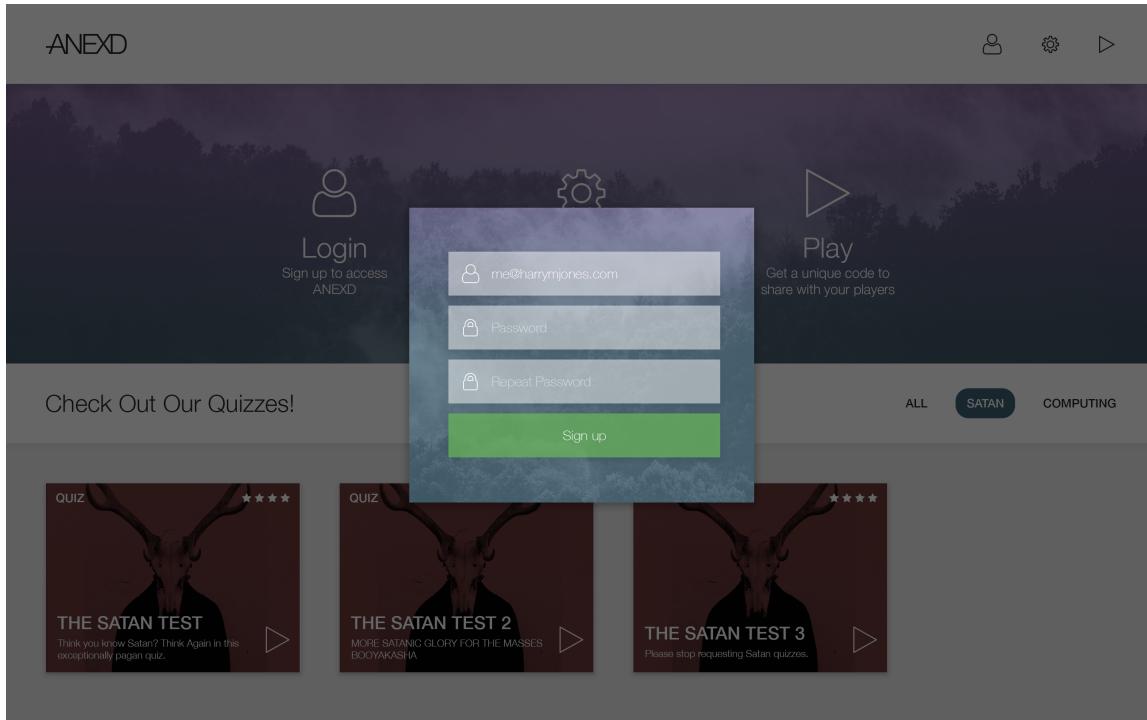

The modal used to allow existing users to login to their accounts. Using a modal allows us to trigger this capability on any screen if dual-logging or session errors occur.

Completed in full:

Sign up

If the email address provided is not recognized as a user, the modal will expand to become the sign up form. This page will allow us to reduce the complexity of sign in/sign up differences and help to create a smooth sign up experience.
