Sass / CSS QA Checklist

Sass

- Appropriate use of nesting
  - Rarely over 4 layers deep
  - No repeated class or id selectors
- Correct use of Sass functionality
  - '&' in place of selector interactivity (:active, :hover, etc.)
  - 'Mixins', variables, and 'includes' if or where necessary
- Clean build from Compass (accessed via grunt) with no warnings
- Clean build from SassMeister (http://www.sassmeister.com/) with no warnings

CSS

- Appropriate locality of selectors (including parent classes for generics)
- Clean build from W3C CSS validator (https://jigsaw.w3.org/css-validator/#validate_by_input) with no warnings
